

DOM assignment

PROBLEM STATEMENT

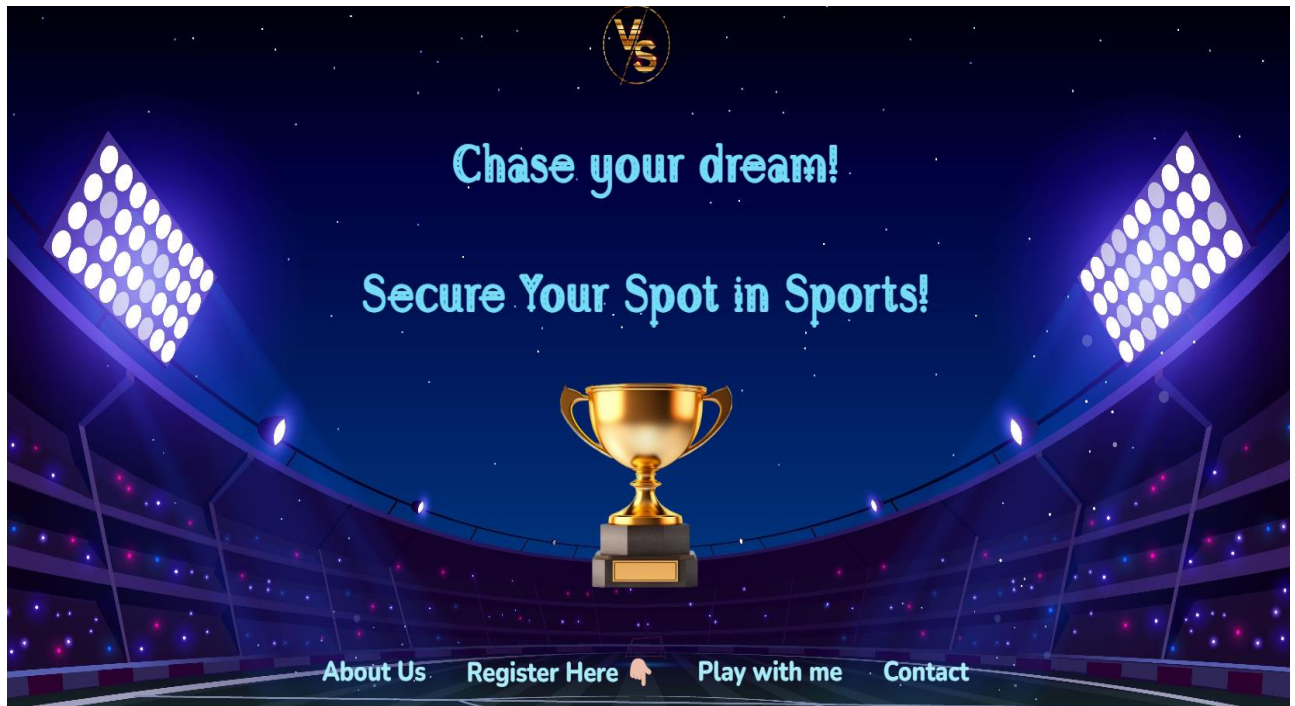

Develop a student registration system where students can register their details such as name, class, address, and contact number. Additionally, it provides functionalities for editing and deleting records.

MY CREATIVITY:

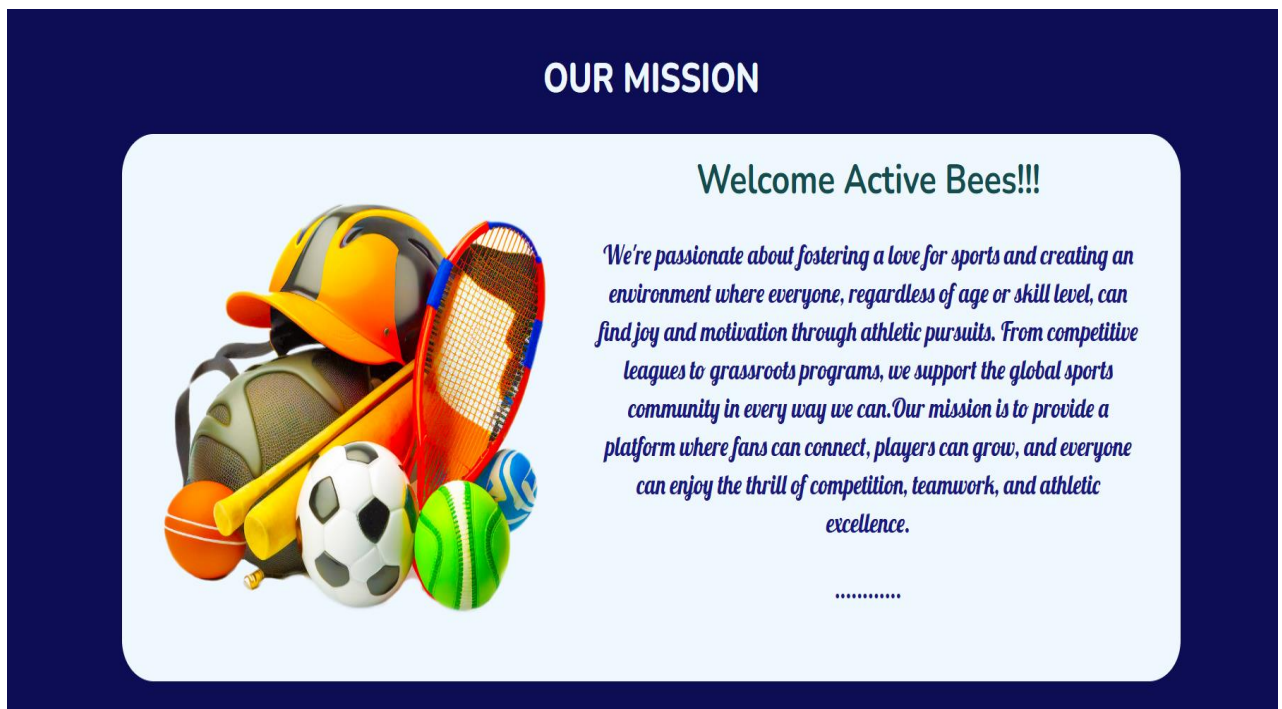

- I develop a student registration system in sports registration website
- I create good background and layout to this website
- I am also give animation to trophy image and text.
- I include about, registration ,what they offers to the students and contact section with better style and visibility.
- In registration section,I include the topics of full name,phone number,state,gender and sports
- I give the functionality to edit and delete button that you can edit your previous data and you can delete what you entered in input field.
- I include good icons to my website and registration section for edit and delete button.
- I have developed a cute and interest game with computer .That will enhance interest on sports and may give joy to who are visited my website.
- When you won the computer that will show you alert –“You won the game!! All the best my friend”.
- Finally I have created user friendly and interactive website to the customers/players.
